Journal of Mechanical Working Technology, 20 (1989) vii–x
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

CONTENTS

1. Machining

An adaptive approach to tool wear sensing and decay rate control in autonomous manufacturing
G. D'Errico (Orbassano, Italy) 3
On the machining of cylindrical objects with complex curvature
H.P. Bao (Columbia, MO, U.S.A.) 17
Tool selection in machining by integration of a data base and a rule based system
H.-S. Jang (Columbus, OH, U.S.A.) and A. Bagchi (Clemson, SC, U.S.A.) 25
Measurement of temperature distribution within tool in metal cutting — Experimental tests and numerical analysis
S. Lo Casto, E. Lo Valvo and F. Micari (Palermo, Italy) 35
Process-controlled machining of gray cast iron
G.W. Fischer, Y. Wei and S. Dontamsetti (Iowa City, IA, U.S.A.) 47
Machinability study of nickel–aluminide alloys
M.A. Elsayed (Lafayette, LA, U.S.A.) and J.T. Scardina (Cookeville, TN, U.S.A.) 59
On the characterization and control of surface finishing damage in ceramics
T.N. Farris and S. Chandrasekar (West Lafayette, IN, U.S.A.) 69
Acoustic emission true RMS signals used to indicate wear of a high speed ceramic insert
C.-F. Yang and J.R. Houghton (Cookeville, TN, U.S.A.) 79
Flank wear modeling in milling
T.A. Papazafiriou and M.A. Elbestawi (Hamilton, Ontario, Canada) ... 93
Die manufacturing by 5- and 3-axes milling — Influence of surface shape on cutting conditions
H.K. Tönshoff and J. Hernández-Camacho (Hannover, F.R.G.) 105
Thermal-based tool sensor for ball burnishing
K.C. Leong and S.W. Lye (Singapore) 121
A study on the surface characteristics of burnished components
S. Rajesham (Kuala Lumpur, Malaysia) and J.C. Tak (Alor Setar, Kedah, Malaysia) 129

2. Computer Integrated Manufacturing/Expert Systems

Integration of design and manufacture of complex geometries through solid and surface modeling techniques
T.C. Ramaraj, E.C. Eleftheriou and R. Ramaraj (Cookeville, TN, U.S.A.) 141
Determining the assembly sequence from a 3-D model
P.K. Khosla and R. Mattikali (Pittsbugh, PA, U.S.A.) 153
Computer integrated machining parameter selection in a job shop using expert systems
B. Gopalakrishnan (Morgantown, WV, U.S.A.) 163
Computer-integrated design, fabrication and inspection of a 3-D curved surface
S.S.G. Lee, N.H. Loh and S.C. Tam (Singapore) 171

3. Manufacturing Management

Scheduling factories of the future
J. Drolet (Trois-Rivières, Quebec, Canada), C.L. Moodie (West Lafayette, IN, U.S.A.) and B. Montreuil (Quebec, Canada) 183
Prototyping a feature based modeling system for automated process planning
S.K. Sim and K.F. Leong (Singapore) 195
Methods for optimization in the manufacturing system — The Taguchi method: an engineering approach to its implementation
R.R. Lindeke and Y.-H.A. Liou (Cleveland, OH, U.S.A.) 205
Some practical considerations in the design of manufacturing process experiments
T.N. Goh (Singapore) 219
A failure detection supporting system for machining process control
X.L. Kong (Xi'an, P.R. China), D.C.H. Yang (Los Angeles, CA, U.S.A.) and H.L. Li (Xi'an, P.R. China) 229
A framework for automated mechanical assembly planning
A.C. Lin and T.C. Chang (West Lafayette, IN, U.S.A.) 237

4. Robotics

An advanced controller for robotic manipulators
J.N. Anderson and A. Śmiarowski, Jr. (Cookeville, TN, U.S.A.) 251
An integrated robotics off-line programming system for modular fixture assembly
S.L. Lam and B.S. Lim (Singapore) 261
Trajectory tracking control for industrial robots
P.V. Nagy (Pittsburgh, PA, U.S.A.) 273

Kinematic analysis and workspace determination of a 6 DOF CKCM robot end-effector
C.C. Nguyen and F.J. Pooran (Washington, DC, U.S.A.) 283
Analysis and control of a three-degree-of-freedom robot platform
J.F. Jansen and R.L. Kress (Oak Ridge, TN, U.S.A.) 295
Design and control of a prototype platform manipulator for workholding and workhandling applications
K.-M. Lee and C. Yien (Atlanta, GA, U.S.A.) 305
A 2-DOF active compliant gripper for robotic applications
O. Masory, J.W. Song and H.J. Liu (Boca Raton, FL, U.S.A.) 315

5. New Manufacturing Processes
Manufacture of a cermet/ceramic coated steel plate by a combined plasma spraying and hot rolling method
M. Murakawa and S. Watanabe (Saitama, Japan) 331
Effect of R.F. control and orbital motion on surface integrity of EDM components
K.P. Rajurkar (Lincoln, NE, U.S.A.) and G.F. Royo (Worcester, MA, U.S.A.) 341
Single residency sintering and consolidation of powder metal alloys, intermetallics, and composites by pulsed homopolar generator discharge
W.F. Weldon and T.A. Aanstoos (Austin, TX, U.S.A.) 353
Machining performance of toughened zirconia ceramic and cold compact alumina ceramic in ultrasonic drilling
B.L. Anantha Ramu, R. Krishnamurthy and C.V. Gokularathnam (Madras, India) 365

6. Flexible Manufacturing Systems

Simulation package for an automated manufacturing system
B.S. Somashekhar, A.J. Hegde and G. Sudheendra (Bangalore, India) 379
Development and implementation of an intelligent flexible manufacturing system
R. Lim, B.S. Lim and N.C. Ho (Singapore) 389
Formation of manufacturing cells by cluster-seeking algorithms
P.H. Gu and H.A. ElMaraghy (Hamilton, Ontario, Canada) 403
Systematic approach to cellular manufacturing systems design
I.Y. Alqattan (Cookeville, TN, U.S.A.) 415
Cellular manufacturing systems design with alternate routing considerations
R.M. Sundaram (Cookeville, TN, U.S.A.) 425

Flexible automated material handling system
A.K. Mazouz and C. Han (Boca Raton, FL, U.S.A.) 433
Simulation modeling of batch job shop type flexible manufacturing systems
P.K. Mishra (Allahabad, India) and P.C. Pandey (Roorkee, India) 441

7. Forming

A finite element solution of strip rolling
R.S. Rao and H.Y. Lee (Ann Arbor, MI, U.S.A.) 453
Influence of die guidance systems on the angular deflection of press slide and die under eccentric loading
H.W. Wagener (Kassel, F.R.G.) and C. Schlott (Sindelfingen, F.R.G.) 463
Autoclave age forming large aluminum aircraft panels
M.C. Holman (Nashville, TN, U.S.A.) 477

8. Machine Tools

Chucking force distribution of collet chuck holders for machining centers
M. Tsutsumi (Tokyo, Japan) 491
Generalized front-end controller design
M.E. Gerules, T.N. Faddis and B.G. Barr (Lawrence, KS, U.S.A.) 503
